INVESTMENT RATIONALE

By incorporating Equity ETFs and Investment Trusts into our process we are able to add broad diversification to the portfolio without high transaction costs. Further, Investment Trusts can trade at a discount or premium to Net Asset Value (NAV) depending on the market environment. Our manager looks to take advantage of periods in time when well managed Investment Trusts trade at significant discounts to NAV in order to add value to the portfolio. He takes a quantitative approach to finding these mispriced opportunities where he can sometimes buy €1 worth of assets for €0.90 or sometimes even less.

STRATEGY ADVANTAGES

BEI is managed by David Flynn, our Chief Investment Strategist. David has over 30 years of industry experience, notably he was a portfolio manager for the iconic hedge fund Brevan Howard for 6 years. He even managed to post positive returns in 2008. Prior to joining Baggot, David worked as a portfolio manager for Merrion Capital Management (now Cantor Fitzgerald). While David has a strong ability to analyze companies from the bottom up, he utilises a top down quantitative approach to investing because it allows him to seek out more opportunity and also to base his process solely on the data as opposed to human bias which can be faulty.
